

# Supreme Court of Victoria

## Digital Transformation

Presentation to the Public Record Office Victoria  
November 2017

Presented by Pauline Diano, Program Director, Supreme Court of Victoria

# Background

- In 2014, the Court Services of Victoria Act separated the Victorian Courts from the Department of Justice
- However, the Court's were still hosted on the Department of Justice network
- This environment was mostly aging, out of support or end of life.

# Background

- The state of the DJR environment limited the Court's ability to be able to implement upgrades, make changes or implement improvements to its core systems

So we built our own.

# The Supreme Court's Digital Transformation

- Built our own network including Wi-Fi
- Rolled out Office 365, Outlook and SharePoint online to the Court and migrated their data
- Rebuilt our Case Management System and other Court applications in Microsoft Azure
- Implemented eFiling plus the Electronic Court File in the Commercial Court

SUPREME  
COURT  
OF VICTORIA

# Have a program of work that includes:

- Deployment of eFiling across all divisions in the Court including Common Law, Criminal Law, Court of Appeal and Probate
- Document Management in SharePoint
- Electronic Disposal of records

# What does this mean for records management?

- One source of truth
- Digital first (our archiving is currently all manual, all paper and 10 years behind)
- Automatic, electronic disposal of the record of the Court

# What were the challenges?

Well, none really

For the first time in my career, they want it faster than  
I can deliver it

# Really no challenges?

Well, maybe funding

And maybe the bureaucracy not wanting us to go out on our own

- But having control of your own environment means that we can respond to the needs of the Court
- We own, administer and maintain our own environment – end-to-end

# What did we learn?

- Having support from senior people in the business is crucial
- Infrastructure is everything
- Your Project Manager and Project Team will make or break you
- And relationships with everyone is everything and then some

# Thank you

# Questions?
